

December 2024 Performance Summary

Program Description

Bocken Trading, LLC is a registered Commodity Trading Advisor formed in February 2011. The program is traded by Megan Bocken. Megan focuses primarily on domestic agricultural commodity futures and options with emphasis on wheat, corn, soybeans, and soybean products. She may, on occasion, trade other Ag related markets. Megan gained a thorough understanding of the grain trade by helping to service commercial grain accounts including both users and producers, and by studying the fundamentals of the grain markets as a research analyst. She currently maintains her own research focusing on wheat, corn, and soybeans placing special emphasis on relationships among the different classes of wheat. This includes forecasting both US and world supply and demand of each particular commodity in order to determine value and price trends based on ever-changing market conditions. It also involves a careful and constant monitoring of US and world weather, geopolitical issues, and currency relationships. By combining the factors, Megan is able to make trading decisions that integrate flat price, intra and inter market spreads as well as options strategies. Both long and short positions are utilized, and trades may vary from day-trades to longer term trades depending on the nature of each market. Her focus is fundamental analysis, but technical analysis is also used to pick entry levels, risk levels, and objectives.

SocGen (SG CTA Index) - Formerly called the Newedge CTA Index, the SG CTA Index provides the market with a reliable daily performance benchmark of major commodity trading advisors (CTAs). The SG CTA Index calculates the daily rate of return for a pool of CTAs selected from the larger managers that are open to new investment. The index does not represent the entire universe of commodity trading advisors. Investors should note that it is not possible to invest in this index.

Bloomberg Commodity Index (BCOM) - BCOM is a broadly diversified commodity price index. The BCOM tracks prices of futures contracts on physical commodities on the commodity markets. The index is designed to minimize concentration in any one commodity or sector. It currently has 22 commodity futures in seven sectors.
